Method of assessing (classes):

- Three written tests:
 - Test no. 1 (mutual inductance, circuits with magnetic coupling) - 30% of the final grade
 - Test no. 2 (three-phase systems) - 35% of the final grade
 - Test no. 3 (transient analysis) - 35% of the final grade
- All tests must be passed.
- The final grade:

Result %	ECTS grade	Local grade	Definition
91 - 100	A	5	EXCELLENT - outstanding performance with only minor errors
81 - 90	B	4,5	VERY GOOD - above the average standard but with some errors
71 - 80	C	4	GOOD - generally sound work with a number of notable errors
61 - 70	D	3,5	SATISFACTORY - fair but significant shortcomings
51 - 60	E	3	SUFFICIENT - performance meets the minimum criteria
0 - 50	F	2	FAIL - some more work required before the credit can be awarded
